

## Adaptive & Hardy

EPDM is now the leading commercial recycled roof membrane in North America. These systems have also received the highest achievable ratings and listings in external fire and wind uplift resistance.

RoofWrap's EPDM meets or exceeds the product testing of the American Society for Testing Materials D4637-04.

### Characteristics that contribute to EPDM's overall system performance include:

- Cyclical membrane fatigue resistance
- High resistance to ozone, weathering & abrasion
- Flexibility in low temperatures
- Thermal shock durability

- ✓ **Single, Seamless Sheet Covers Entire Roof**
- ✓ **Permanently Stops Leaks**
- ✓ **Easily Installed**
- ✓ **Low Cost - Long Service Life**
- ✓ **10 Year Warranty**

Join satisfied RoofWrap customers across North America and solve your roofing problems once and for all... at an affordable price.

**ROOFWRAP**  
MOBILE HOME ROOFING SYSTEM

*Affordable, Long-Term, Easily Installed*

## Why Is RoofWrap Right For You?

RoofWrap Mobile Home Roofing Systems are simple, tried-and-true, complete system kits using a single, seamless, white or black, EPDM rubber sheet membrane that is custom cut to fit right over the existing roof. No roof seams, a tough membrane, affordable cost, and simple installations are the keys to RoofWrap's popularity and success. RoofWrap is your only source that offers these materials all conveniently supplied in one, easily purchased system.

We offer direct sourcing to commercial grade materials that have been previously limited to contractors through wholesale-only sources. What's more, you don't have to buy contractor size package components. RoofWrap's custom kits provide you with just the amount you need for your job requirements. Need just ten feet of an item? You'll be supplied just that, rather than the 100 foot factory roll. Multiply the savings of each component and the savings are significant.

# ROOFWRAP FAST FACTS

The RoofWrap kit delivered to your home is a complete system, easily applied by most any contractor or self-installed with no special tools, in one day, with just three workers. It

weighs only 1/3 pound per square foot, is able to stretch three times its relaxed size, is extremely durable and, best of all, is a great, affordable value.

- **Stops Leaks Permanently**
- **Single Seamless Sheet Covers Entire Roof**  
Custom cut membrane lessens points of water entry.  
Available in Black or White.
- **Total Roof Design**  
Complete system includes all membrane, fasteners, metal flashings hoods, caulk, sealants, applicators, primers and more.
- **Greatly Reduces Maintenance**  
Unlike messy and temporary coatings and repair mastics, RoofWrap's EPDM rubber membrane is a proven, long-term solution. Roof debris cleans off easily.
- **Ten Year Material Warranty**  
The roof membrane is backed by a ten year warranty.
- **Improves Appearance**  
White membrane provides a clean white surface. Both colors eliminate unsightly rusting, cracking or evidence of repairs.
- **Reduces Roof Noise**  
Enjoy the peace and quiet that comes with sound absorbing EPDM rubber.
- **Reduces Energy Costs**  
White membrane and use of optional insulation board will reduce heating and cooling costs.
- **Puncture Resistant**  
Tough, durable and elastic EPDM rubber resists penetrations.
- **Resists Sun Damage**  
EPDM rubber is known for its resistance to harsh UV exposure.

## Time Tested Systems

RoofWrap's EPDM rubber has been manufactured in the USA since the mid-1960's. We have developed the most cost effective, simple to install and longest lasting systems in today's market. No other source provides you with such a complete, custom package of top quality, long, proven components.

We are committed to the use of one-piece EPDM rubber sheets as the best choice for retrofitting over existing mobile home roofs. RoofWrap is lightweight and can handle roof stresses with its ability to stretch three times its relaxed size. All this plus it is highly puncture, tear and impact resistant and is made to withstand extremes in temperature, building movement and thermal shock.

This same EPDM rubber has been the U.S. Federal Government's most specified low slope roofing membrane. From the typhoon-prone facilities in Guam and Hawaii to the extremes of Alaska and cross all of North America, EPDM rubber has met their needs.

Ask those in the professional commercial roofing field: EPDM is the number one roofing choice of architects, roof consultants and contractors for both new construction and replacement roofing projects according to Building Design and Construction magazine and the National Roofing Contractors Association market surveys.

Annually, over 1 billion square feet of new EPDM roof coverings are installed in the United States. Within just the United States, more than 500,000 warranted roofs and 20 billion square feet have been installed.
